Reminder

1

Security

Please safely use electricity, follow operating procedures to avoid puncturing needles.

Environment

Place the machine in a dry environment and keep it away from children.

Voltage

The machine supports wide voltage input, the voltage range is 110V to 240V.

Check out the video to set up the machine. Wrong settings may cause the machine to stop working.

Before threading and installing the embroidery frame, please ensure the machine is in the following state:

Turn off the power

Raise the presser foot for proper threading

Reset the handwheel to ensure the needle is in the highest point

Threading the machine

2

! Tips: Please make sure to lift the presser foot before threading

! Tips: After threading, pull the thread to confirm whether the thread feeding is smooth

Lift the thread stand

Insert the thread

Insert pin cap

Pass through the hook

Pass through the clip

Pass between two metal sheets

Bypass the spring

Bypass the rod

Bypass the needles clip

Threading the machine

3

Tips: Step 7: Pull the thread upwards, pass through the elastic hook, and pull it.
Step 8: The thread pass through the upper hook.

10

Lower the presser foot

11

Pass the automatic threading device

12

Press the pressure rod

13

Pass the barb
Release the pressure bar

14

Pull out thread

15

Through the presser foot
Cut the thread

If you use manual threading, follow step

a

b

c

a

Lower the presser foot

b

Pass the pinhole

c

Through the presser foot, cut the thread

Install the bobbin

4

1

Pull the buckle to the right

2

Place the bobbin counterclockwise

3

Thread follow the arrow and put the thread under the plastic sheet

4

Clamp the cover on the left side
Press the cover

Tips: We have prepared a prewound bobbin, which is installed inside the machine.

Install the frame

5

Tips:

1. For better installation, loosen the screws first.
2. Please place a layer of backing under the fabric.
3. Place fabric and backing inside the frame. Make sure the fabric is straighten.

Start up

6

- 1 Plug in
- 2 Press the switch button

Choose the pattern

7

Config the pattern

8

Segurança

Utilize eletricidade em segurança e siga os procedimentos operacionais para evitar perfurações de agulhas.

MEio Ambiente

Coloque a máquina num ambiente seco e mantenha-a longe das crianças.

Tensão

A máquina suporta uma ampla entrada de tensão, a gama de tensão é de 110 V a 240 V

Confira o vídeo para configurar a máquina. As definições erradas podem fazer com que a máquina deixe de funcionar.

Antes de enfiar e instalar o bastidor de bordar, certifique-se de que a máquina está nas seguintes condições:

Desligue a alimentação

Levante o calçador para passar a linha corretamente

Reposicione o volante para garantir que a agulha está no ponto mais alto

Enfiando a máquina

11

! Dicas: Certifique-se de que levanta o calcador antes de o enfiar

! Dicas: Após a passagem da linha, puxe a linha para confirmar se a alimentação da linha é suave

Levante o suporte da linha

Introduza a linha

Insira a tampa do perno

Passe pelo gancho

Passe pelo clipe

Passe entre duas chapas metálicas

Ignore a mola

Ignore a haste

Ignore o clipe da agulha

Enfiando a máquina

12

💡 Pontas: Passo 7: Puxe a linha para cima, passe-a pelo gancho elástico e puxe-a.
Passo 8: A linha passa pelo gancho superior.

Baixe o calcador

Passe o dispositivo de enfiamento automático

Pressione a haste de pressão

Passe a farpa
Solte a barra de pressão

Puxe a linha

Através do calcador
Corte o fio

Se utilizar o enfiamento manual, siga os passos: a b c

Baixe o calcador

Passe o orifício do alfinete

Através do calcador, corte a linha

Instalar a bobina

13

 **Dicas:** Preparamos uma bobina pré-enrolada, que é instalada no interior da máquina.

Instalar a estrutura

14

Pontas:

1. Para uma melhor instalação, desaperte primeiro os parafusos.
2. Coloque uma camada de suporte por baixo do tecido.
3. Coloque o tecido e o suporte dentro da moldura. Certifique-se de que o tecido está esticado.

- 1 Conecte
- 2 Pressione o botão do interruptor

- 1 Clique no padrão integrado

- 2 Escolha um padrão

 Seguridad

Por favor, use la electricidad de manera segura, siga los procedimientos operativos para evitar perforaciones con agujas.

 Entorno

Coloque la máquina en un entorno seco y manténgala alejada de los niños.

 Voltaje

La máquina admite una entrada de voltaje amplio, el rango de voltaje es de 110V a 240V.

Consulte el video para configurar la máquina. Configuraciones incorrectas pueden causar que la máquina deje de funcionar.

Antes de enhebrar e instalar el marco de bordado, asegúrese de que la máquina esté en el siguiente estado:

Apague la máquina

Levante el prensatelas para un enhebrado adecuado

Restablezca el volante para asegurar que la aguja esté en el punto más alto

! Consejos: Asegúrese de levantar el prensatelas antes de enhebrar.

! Consejos: Después de enhebrar, tire del hilo para confirmar si la alimentación del hilo es suave.

Paso 7: Tire del hilo hacia arriba, pase por el gancho elástico y tire de él.

Paso 8: El hilo pasa por el gancho superior.

10

Baje el prensatelas

11

Pase el dispositivo de enhebrado automático

12

Presione la barra de presión

13

Pase la púa
Suelte la barra de presión

14

Tire del hilo

15

Pase por el prensatelas
Corte el hilo

Si utiliza el enhebrado manual, siga el paso

a

b

c

a

Baje el prensatelas

b

Pase el agujero del pin

c

Pase por el prensatelas
corte el hilo

1

Tire del broche hacia la derecha

2

Coloque la bobina en sentido antihorario

3

Enhebre siguiendo la flecha y coloque el hilo
debajo de la hoja de plástico

4

Sujete la cubierta en el lado izquierdo
Presione la cubierta

Consejos: Hemos preparado una bobina preenrollada, que está instalada dentro de la máquina.

Consejos:

1. Para una mejor instalación, afloje primero los tornillos.
2. Coloque una capa de respaldo debajo de la tela.
3. Coloque la tela y el respaldo dentro del marco. Asegúrese de que la tela esté estirada.

- 1 Enchufe
- 2 Presione el botón de encendido

⚡ Sécurité

Veuillez utiliser l'électricité en toute sécurité, suivre les procédures d'exploitation pour éviter de percer les aiguilles.

🔥 Environnement

Placez la machine dans un environnement sec et gardez-la à l'écart des enfants.

🔌 Tension

La machine prend en charge une entrée de tension large, la plage de tension est de 110V à 240V.

Regardez la vidéo pour configurer la machine. Des réglages incorrects peuvent entraîner l'arrêt de la machine.

Avant d'enfiler et d'installer le cadre de broderie, veuillez vous assurer que la machine est dans l'état suivant :

Éteignez l'alimentation

Soulevez le pied-de-biche pour un enfilage correct

Réinitialisez le volant pour s'assurer que l'aiguille est au point le plus haut

! Conseils: Veuillez vous assurer de soulever le pied-de-biche avant d'enfiler.

! Conseils: Après l'enfilage, tirez le fil pour vérifier si l'alimentation en fil est fluide.

💡 Conseils: Étape 7: Tirez le fil vers le haut, passez par le crochet élastique et tirez-le.
Étape 8: Le fil passe par le crochet supérieur.

Si vous utilisez l'enfilage manuel, suivez l'étape a b c

Conseils: Nous avons préparé une canette pré-enroulée, qui est installée à l'intérieur de la machine.

Conseils:

1. Pour une meilleure installation, desserrez d'abord les vis.
2. Veuillez placer une couche de support sous le tissu.
3. Placez le tissu et le support à l'intérieur du cadre. Assurez-vous que le tissu est redressé.

- 1 Branchez
- 2 Appuyez sur le bouton d'alimentation

- 1 Cliquez sur le motif intégré

- 2 Choisissez un motif

Sicherheit

Por favor, use la electricidad de manera segura, siga los procedimientos operativos para evitar perforaciones con agujas.

Umgebung

Stellen Sie die Maschine in einer trockenen Umgebung auf und halten Sie sie von Kindern fern.

Spannung

Die Maschine unterstützt einen breiten Spannungseingang, der Spannungsbereich liegt zwischen 110V und 240V.

Sehen Sie sich das Video an, um die Maschine einzurichten.
Eine falsche Einrichtung kann dazu führen, dass die Maschine nicht mehr funktioniert.

Stellen Sie vor dem Einfädeln und Einsetzen des Stickrahmens sicher, dass die Maschine in folgendem Zustand ist:

Schalten Sie die Stromversorgung aus

Heben Sie das Füßchen an und fädeln Sie richtig ein

Setzen Sie das Handrad zurück und stellen Sie sicher, dass die Nadel auf dem höchsten Punkt ist

! Tipp: Heben Sie das Füßchen unbedingt vor dem Einfädeln an.

! Tipp: Ziehen Sie nach dem Einfädeln den Faden, um sicherzustellen, dass der Faden glatt läuft.

Heben Sie den Fadenständer an

Setzen Sie den Faden ein

Setzen Sie die Nadelkappe auf

Fädeln Sie durch den Haken

Fädeln Sie durch die Klemme

Fädeln Sie zwischen den beiden Metallplatten hindurch

Umwickeln Sie die Feder

Umwickeln Sie den Stab

Umwickeln Sie die Nadelklemme

Tipp:

Schritt 7: Ziehen Sie den Faden nach oben durch den Spannhaken und ziehen Sie ihn heraus.

Schritt 8: Der Faden geht durch den oberen Haken.

10

Senken Sie das Füßchen ab

11

Fädeln Sie durch die automatische Einfädelvorrichtung

12

Drücken Sie den Hebel nach unten

13

Fädeln Sie durch den Rückhaken
Lassen Sie den Hebel los

14

Ziehen Sie den Faden heraus

15

Fädeln Sie durch das Füßchen
und schneiden Sie den Faden ab

Wenn Sie manuell einfädeln, befolgen Sie die Schritte: **a** **b** **c**

a

Senken Sie das Füßchen ab

b

Fädeln Sie durch das Nadelöhr

c

Fädeln Sie durch das Füßchen
und schneiden Sie den Faden ab

1

Ziehen Sie den Verschlussring nach rechts

2

Setzen Sie die Spule gegen den Uhrzeigersinn ein

3

Fädeln Sie den Faden gemäß dem Pfeil ein und
legen Sie den Faden unter die Plasticscheibe

4

Drücken Sie den linken Deckel fest
Drücken Sie den Deckel nach unten

Tipp: Wir haben eine vorgewickelte Spule vorbereitet, die sich im Inneren der Maschine befindet.

Tipp:

1. Um die Installation zu erleichtern, lösen Sie zuerst die Schrauben.
2. Legen Sie eine Lage Rückenstütze unter den Stoff.
3. Legen Sie den Stoff und das Vlies in den Rahmen. Stellen Sie sicher, dass der Stoff straff ist.

- 1** Schließen Sie das Netzkabel an
- 2** Drücken Sie den Netzschalter

6 Klicken Sie auf Stickerei

7 Klicken Sie auf Spur, um den Stickbereich zu bestätigen

8 Klicken Sie auf Bereit

9 Senken Sie das Füßchen ab und drücken Sie den Startknopf an der Maschine

Sicurezza

Utilizzare l'elettricità in modo sicuro e seguire le procedure operative per evitare di pungere gli aghi.

Ambiente

Posizionare la macchina in un ambiente asciutto e tenerla fuori dalla portata dei bambini.

Voltaggio

La macchina supporta un'ampia gamma di voltaggi, da 110 V a 240 V.

Guarda il video per configurare la macchina. Impostazioni errate potrebbero causare l'arresto della macchina.

Prima di infilare e installare il telaio per ricamo, assicurarsi che la macchina si trovi nelle seguenti condizioni:

Spegnere la macchina

Sollevare il piedino premistoffa per infilare correttamente

Ripristinare il volantino per assicurarsi che l'ago sia nel punto più alto

! Consigli: Assicurarsi di sollevare il piedino premistoffa prima di infilare.

! Consigli: Dopo l'infilatura, tirare il filo per verificare che l'alimentazione del filo sia regolare.

Suggerimenti: Passaggio 7: Tirare il filo verso l'alto, farlo passare attraverso il gancio elastico e tirarlo.
Passaggio 8: Il filo passa attraverso il gancio superiore.

Se si utilizza l'infilatura manuale, seguire i passaggi: a b c

Suggerimenti: Abbiamo preparato una bobina preavvolta, che viene installata all'interno della macchina.

Conseils:

1. Per un'installazione migliore, allentare prima le viti.
2. Posizionare uno strato di supporto sotto il tessuto.
3. Posizionare il tessuto e il supporto all'interno del telaio. Assicurarsi che il tessuto sia steso.

- 1 Collega
- 2 Premi il pulsante di accensione

- 1 Fai clic sul pattern predefinito

- 2 Scegli un pattern

Configura il pattern

53

Avvia il ricamo

54

⚡ Безопасность

Используйте электроэнергию безопасно и соблюдайте правила эксплуатации, чтобы избежать проколов иглой.

🌡 Окружающая среда

Размещайте машину в сухом месте, вдали от детей.

🔌 Напряжение

Машина поддерживает широкий диапазон входного напряжения, от 110В до 240В.

Посмотрите видео, чтобы настроить машину. Неправильная настройка может привести к прекращению работы машины.

Перед заправкой нити и установкой пальцев убедитесь, что машина находится в следующем состоянии:

1
Выключите питание

2
Поднимите прижимную лапку и правильно заправьте нить

3
Сбросьте маховое колесо, убедитесь, что игла находится в верхней точке

! Подсказка: Перед заправкой нити обязательно поднимите прижимную лапку.

! Подсказка: После заправки нити потяните нить, чтобы убедиться, что она проходит плавно.

Подсказка:

Шаг 7: Подтяните нить вверх через натяжной крючок и вытяните.

Шаг 8: Нить проходит через верхний крючок.

10

Опустите прижимную лапку

11

Проденьте через автоматическое устройство заправки нити

12

Опустите рычаг

13

Проденьте через обратный крючок. Опустите рычаг

14

Вытяните нить

15

Проденьте через прижимную лапку и отрежьте нить

Если вы используете ручную заправку, следуйте следующим шагам:

a b c

a

Опустите прижимную лапку

b

Проденьте через ушко иглы

c

Проденьте через прижимную лапку и отрежьте нить

1

Потяните фиксатор вправо

2

Установите шпульку против часовой стрелки

3

Проденьте нить в направлении стрелки и поместите ее под пластиковую пластину

4

Зафиксируйте левую крышку. Нажмите на крышку

Подсказка: Мы подготовили предварительно намотанную шпульку, установленную внутри машины.

Подсказка:

1. Чтобы облегчить установку, сначала ослабьте винты.
2. Пожалуйста, поместите подложку под ткань.
3. Поместите ткань и подложку в пальцы. Убедитесь, что ткань натянута.

- 1 Подключите питание
- 2 Нажмите кнопку включения
